SUMMARY

- Full Stack Web Developer with a background in Management.
- Earned certificate in web development from the University of Kansas, learning the principles of HTML, CSS, JavaScript, React, MySQL, and multiple other technologies.
- Acquired a great sense of teamwork and accountability from management experience.
- Worked on multiple projects in a team setting, applying both, front and backend technologies.

TECHNICAL SKILLS

Technical Languages: HTML, CSS, JavaScript, Node.js Express.js, MySQL, MongoDB, React, Bootstrap, Mongoose, Sequalize, jQuery, and Foundation.

Applications: Progressive Web Applications, Third-Party APIs, Heroku deployment, and ORM implementation.

PROJECTS

The Chiefdom
- GitHub Link: https://github.com/PierTwo/The-Chiefdom-Blog
- Link To Deployed Project: https://safe-plains-05155.herokuapp.com/

- A website that allows users to create posts related to the Kansas City Chiefs, interact with other account members' posts through likes and comments, and then stores all interactions and posts on a personal profile. Our website also gives resource material on the Chiefs such as a schedule, a live Twitter feed of the Chief's official account, former Chiefs legends, and odds on their success.
- I was responsible for JavaScript functionality, Handlebar implementation, and backend assistance. I also pulled in Twitter live feed, helped with login/logout functionality, and user profile functionality.
- Tools used include HTML, CSS, JavaScript, Express, MySQL, Sequalize, Foundation, jQuery, Node, Heroku, Insomnia, and Handlebars.

API Weather Dashboard
- GitHub Link: https://github.com/c529j466/API-Weather-Dashboard
- Link To Deployed Project: https://c529j466.github.io/API-Weather-Dashboard/

- A weather dashboard using OpenWeather One Call API. This dashboard also stores your searched cities on tabs in a sidebar and pulls them from local storage to easily access the weather for your previously searched cities.
- I was the only developer on this dashboard, creating all the functionality and UI.
- Tools Used include HTML, CSS, JavaScript, jQuery, Bootstrap, and the OpenWeather One Call API.

PWA Text Editor
- GitHub Link: https://github.com/c529j466/PWA-Text-Editor
- Link To Deployed Project: https://warm-shore-46330.herokuapp.com/

- A text editor for creating projects in web development.
- I integrated the progressive web application functionality into the text editor. The project utilized the webpack bundler, concurrently Npm package, and Indexed DB principles to add this PWA functionality.
- Tools Used include HTML, CSS, JavaScript, Webpack, Node, and Express.

EXPERIENCE

Manager
2015-Current
Lawrence KS
Dominos

Analyze and resolve quality and customer service issues, recommending system improvements. Accomplish store objectives by managing staff and evaluating activities. Route multiple drivers with multiple deliveries, using a cost-effective strategy. Establish control systems for costs and labor, meeting budget guidelines. Orientate and train employees, encouraging confidence and helping individuals adapt faster to job roles. Collaborate with staff to develop and carry out processes, resulting in improved performance.

- Was on the Management Staff during the franchise's main growth, including record sales weeks in five straight weeks, still standing.
- Received numerous awards for pizza time and years of service

Consultant
2017-2018
Overland Park KS
Cerner/Bradford & Galt

Traveled to hospitals and clinics who were integrating new Cerner technologies to help them learn the system functionality. Worked with Doctors, Nurses, and clinician staff to make the transition from their old system to the new Cerner system manageable. Worked with IT Specialists to find bugs and technical issues.

<div align="center">**EDUCATION**</div>
